

# *Protecting the Critical Infrastructure that protects you, Hospitals*

## **#INTERSEC19**

**By:**

**Andrew Friend, MA, CEM  
Disaster Clinical Specialist  
King Faisal Specialist Hosp. & RC**

**Faisal Al Mazam  
Director, Protective Services  
Cleveland Clinic**

# The Challenge

Restricting Access vs Ease  
of Movement

# How to setup a comprehensive Security Program:

- Hazard Identification & Risk Assessment (Threat Assessment)
  - Determine Threats/Hazards (All Hazards)
  - Determine Vulnerability
  - Determine impact to assets (Consequence Analysis)

# Hazard Mitigation Program:

- Hazard Mitigation Projects (Impact the most hazards)
- Layers of Defense

## **Layer 1:** The perimeter

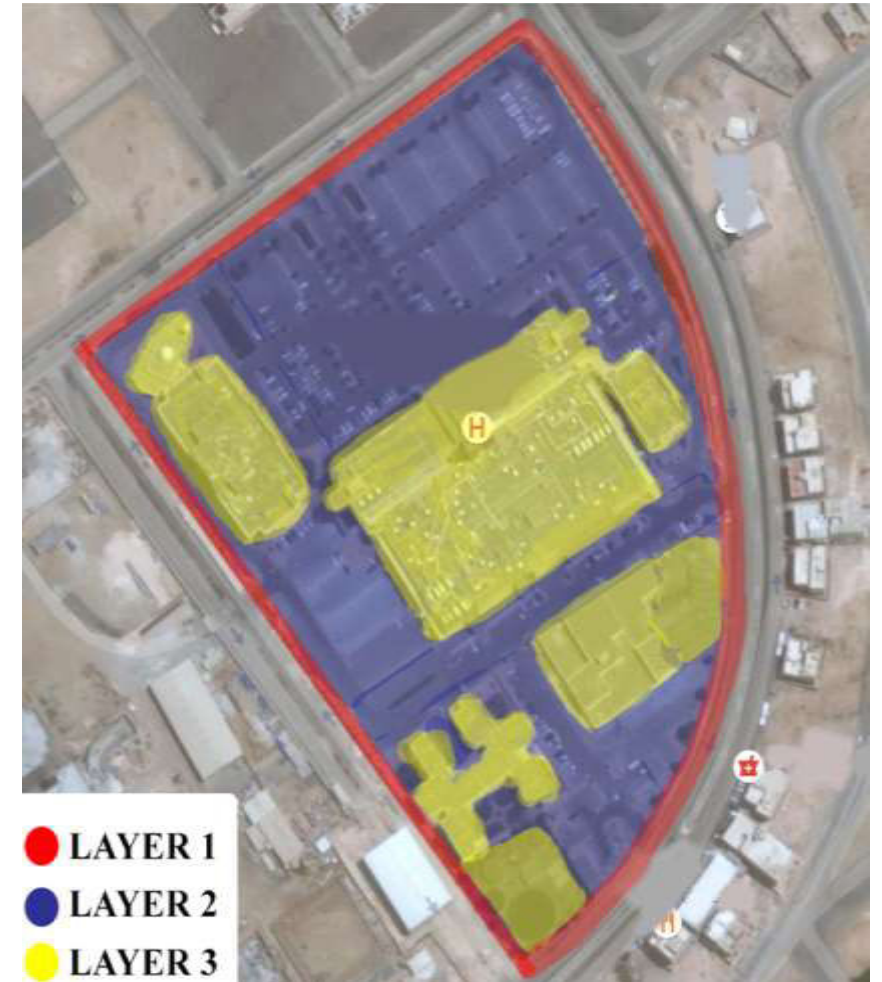

-Fences, CCTV, Flood Lights, Sensors, Gates, Guards, screening, etc

## **Layer 2:** Space between 1 & 3

-Roads, passive/active barriers, Ballard's, Security, CCTV, Lighting, etc

## **Layer 3:** The assets

-Access Control, CCTV, Guards, screening, etc

# Preparedness:

- Security Management Plan
- Emergency Preparedness Plan
- Emergency Operations Plan (EOP)
- Strategic Plan
- Continuity of Operations Plan (COOP)
- Drills/Exercises

# Response:

- **Plans, Mitigations & Practice in Acton**

# Recovery:

- Restore Mission Essential Functions (MEF's)
  - COOP
- Repairs
- Restock
- After Actions Review (AAR)
  - **What happened**
  - **What worked**
  - **What didn't**

“We believe the 9/11 attacks revealed four kinds of failures: **in imagination,** policy, capabilities, and management.”

**-9/11 Commission Report**
