

NFPA FIRE & LIFE SAFETY ECOSYSTEM

It's a big world, let's protect it together.™

WHAT IS THE FIRE & LIFE SAFETY ECOSYSTEM?

The Fire & Life Safety Ecosystem has **8 components**; each plays a critical role in protecting people and property.

TODAY'S FIRE PROBLEM

YOUR ROLE IN THE ECOSYSTEM

Safety is everyone's responsibility. Your role can and will impact safety.

Do you know your role? What part do you play in the safety ecosystem?

GOVERNMENT RESPONSIBILITY

DEVELOPMENT AND USE OF CURRENT CODES

REFERENCED STANDARDS

INVESTMENT IN SAFETY

SKILLED WORKFORCE

CODE COMPLIANCE

PREPAREDNESS AND EMERGENCY RESPONSE

INFORMED PUBLIC

CONCLUSION

Here's what we know:

- No single entity can prevent a fire or disaster from occurring.
- There is no single answer to safety.
- We may not be able to prevent every tragedy from occurring, but by working together, recommitting to and promoting prevention, protection and education, we can further our fire and life safety work to help save lives and reduce loss.

It's a big world, let's protect it together.

THANK YOU!
